

## REMARKS

The Applicants respectfully request entry and consideration of the foregoing amendments.

Claims 1-30 are requested to be cancelled, without prejudice.

Claims 31-50 are being added.

This amendment adds and/or deletes claims in this application. A detailed listing of all claims that are, or were, in the application, irrespective of whether the claim(s) remain under examination in the application, is presented, with an appropriate defined status identifier.

After amending the claims as set forth above, claims 31-50 are now pending in this application.

In the Decision on Appeal, the Board of Patent Appeals and Interferences made a new ground of rejection using its authority under 37 C.F.R. § 41.50(b). Claim 1 was rejected under 35 U.S.C. § 103(a) as being obvious over U.S. Patent No. 5,915,265 to Crocker ("Crocker") in view of U.S. Patent No. 5,793,385 to Nale ("Nale"). This rejection is respectfully traversed.

Claims 1-30 have been cancelled, and new claims 31-50 have been added. These claims have a different scope than old claims 1-30. Accordingly, Applicants expressly withdraw any claim amendments and remarks (including remarks directed to or about any cited reference) made in connection with old claims 1-30. The Applicants do not intend any prior claim amendment or remark regarding old claims 1-30 to have any effect on the prosecution or scope of any of new claims 31-50.

Claim 31 recites:

wherein in a first display mode the display controller is configured to retrieve a first amount of information from the memory to be displayed on the display, and in a second display mode the display controller is configured to retrieve a second amount of information

smaller than the first amount of information from the internal display memory to be displayed on the display.

Claim 40 recites:

display logic configured in a first display mode to retrieve a first amount of information from a memory to be displayed on a display and in a second display mode to retrieve a second amount of information smaller than the first amount of information from the internal display memory to be displayed on the display.

Claim 45 recites:

in a first display mode, retrieving a first amount of information from a first memory device to be displayed on the display, and

in a second display mode, retrieving a second amount of information smaller than the first amount of information from a second memory device to be displayed on the display.

Neither Crocker nor Nale discloses these elements of claims 31, 40 or 45. Accordingly, reconsideration and withdrawal of the rejection is respectfully requested.

Favorable consideration of the application as amended is respectfully requested.

The Examiner is invited to contact the undersigned by telephone if it is felt that a telephone interview would advance the prosecution of the present application.

Please direct all correspondence to the undersigned attorney or agent at the address indicated below.

Respectfully submitted,
